PROFESSIONAL EXPERIENCE

PrimaKu, Jakarta • Frontend Engineer   12/2022 - Present

At Primaku, a startup specializing in child growth and development, I collaborated with a team to redesign the landing page website, prioritizing user experience enhancements. Additionally, I played a pivotal role in developing and implementing features for booking vaccine appointments, ensuring a seamless user journey. My contributions extended to optimizing the interface of the clinic information system. Beyond frontend responsibilities, I actively participated in managing and developing back office applications, streamlining internal processes. Notably, I also contributed to numerous other web projects, working alongside my team to enhance functionality and aesthetics across multiple platforms.

- ▶ Projects involving creating and maintaining software
- ▶ Convert Figma designs into web applications
- ▶ Connect the web applications with external services
- ▶ Collaborate within a team
- ▶ Reviewing code for each developer
- ▶ Engaging in activities like grooming, sprint planning, daily stand-ups, and sprint retrospectives follows both the Scrum and Kanban methodologies, especially for special projects.

KiriminAja 5, Yogyakarta • Frontend Developer   01/2023 - 04/2024

At Kiriminaja, a logistics and delivery startup, I took charge of initiating and executing the revamp of the Kiriminaja app, focusing on its frontend development. This involved enhancing various features such as reporting, managing regular and instant package deliveries, implementing a ticketing system, and integrating a landing page builder feature, among many others. Additionally, I led efforts in updating the frontend of the back office apps, ensuring seamless integration and functionality across the platform.

iCreativeLabs, Bandung • Frontend Developer   01/2022 - 05/2023

At iCreativeLabs, a software development company, I gained valuable experience managing various projects, including Manulife Reksadana (an investment company), developing scraping tools for social media apps, creating a cloud-based CMS application, designing a dashboard for BPPT, and numerous other projects.
